

SAAS
SPONSOR AN AFRICAN SCHOLAR

STUDENT PROFILE

NAME: Jenifer

AGE: 20

SCHOOL: Voi Girls Education Centre

COURSE: Secondary School Education

CAREER: Nurse

Jenifer is a Form 3 student at **Voi Girls Education Centre** and is expected to complete her high school education in 2027. She aspires to become a **Nurse** in the future, driven by a strong desire to serve and help others.

She is the second-born in a family of three children—two boys and one girl. Jenifer lives with her mother and two brothers in a single-room house with electricity but no running water. Her parents separated 12 years ago, leaving her mother as the sole caregiver. To support the family, her mother relies on manual labor, while Jenifer's elder brother, who was unable to continue beyond primary school due to lack of school fees, also takes on casual jobs to contribute to the household income.

Because of financial challenges, Jenifer's education was delayed. She only joined high school in 2024, made possible through county bursaries and her mother's savings. Despite being older than most students in her class, Jenifer remains highly motivated and determined to succeed academically.

The SAAS scholarship has provided much-needed relief to her family and has enabled Jenifer to focus fully on her studies without the constant worry of school fees. Her favorite subjects are **Biology** and **Mathematics**, aligning closely with her dream of pursuing a career in nursing. In her free time, she enjoys watching movies.

Jenifer is a resilient and hardworking student whose determination continues to shine despite the challenges she has faced.
